HOW TO PRINT?

Orange: Heating

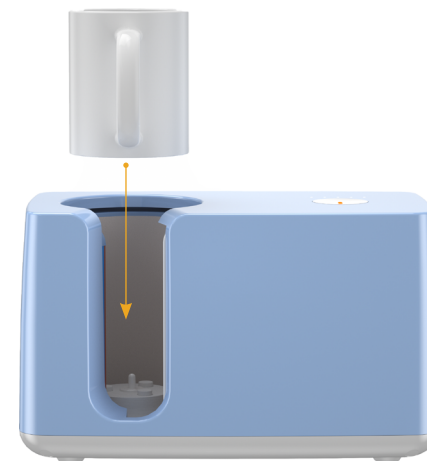

Green: Reaching the set temperature

1

1. As the indicator light turns green, you can start printing your mug.

2

2. Put the mug into the mug heater. Once the sensor feels the mug, the mug heater start to close and wrap the mug automatically.

Be careful! Avoid direct touch on heat platen!

INDICATOR LIGHT STATE

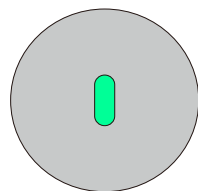

If the first light is blinking in white, it indicates the machine is still heating up. The whole process takes about 180 seconds

If all lights are on, it indicates the whole printing process is finished. The mug heater will open automatically, and you can take out the mug.

EMERGENCY STOP

You can press the button anytime to open the mug heater in case of emergency.

RESET DISORDERED BLINKING LIGHT

Press the button for 5 times continuously to stop the machine. After 15 seconds, it will restart automatically.

PRINTING SETTING

Use sublimation printer to print your design on sublimation paper.
